Hiring Manager
Spectral MD, Inc.
Texas, United States

Dear Hiring Manager,

I am writing to apply for the Computer Vision Intern position at Spectral MD, Inc.

Currently, I am pursuing a Master's degree in Computer Science at USC, where my coursework and projects in computer graphics have strengthened my interest in developing interactive visualization tools for 3D meshes derived from computer vision-based reconstruction pipelines.

My academic background provides a robust foundation in 3D graphics and visual development. At USC, I've successfully completed multiple projects utilizing 3D graphics frameworks such as OpenGL, enhancing my proficiency in C++ and Python. Previously, I double-majored in Computer Science and Mathematics at the University of Toronto, gaining a solid theoretical grounding in mathematics and algorithms. Additionally, my one-year co-op experience significantly improved my debugging skills and my ability to solve complex technical challenges.

I am excited about the opportunity to contribute my skills and experience to Spectral MD, Inc., particularly in areas involving advanced visualization techniques and innovative computer vision applications.

Thank you for considering my application. I look forward to the possibility of discussing this opportunity further.

Sincerely,

Yumeng He
