Hiring Manager
Sony
Los Angeles, CA

Dear Hiring Manager,

I am writing to apply for the 2025 Summer Associate position at Sony Immersive Music Studios. I am currently pursuing a Master's degree in Computer Science at USC, where my coursework and project work in computer graphics have fueled my passion for creating immersive, interactive experiences. I am excited about the opportunity to combine my technical expertise with my enthusiasm for music and entertainment to help reimagine how audiences engage with music.

My academic background includes a strong foundation in 3D graphics and visual development, and I have completed multiple OpenGL projects that sharpened my proficiency in C++. During my undergraduate studies at the University of Toronto, I double-majored in Mathematics and Computer Science, which gave me a solid theoretical understanding of problem-solving. My one-year co-op program further developed my debugging skills and ability to tackle complex challenges. If you would like to learn more about my work, please feel free to visit my personal webpage at <https://heyumeng.com>.

I am eager to apply my experience to Sony Immersive Music Studios, particularly in the areas of Unreal Engine, generative AI, and interactive audiovisual experiences. The prospect of working in a small team to prototype music-focused LBE environments, develop real-time 3D content, and collaborate with senior executives aligns closely with my interests. I welcome the chance to bring my creativity, curiosity, and technical skill set to your team.

Thank you for considering my application. I look forward to the possibility of contributing to Sony Music's mission to push creative boundaries and deliver next-generation immersive music experiences.

Sincerely,

Yumeng He
