Hiring Manager
Samsung
665 Clyde Avenue
Mountain View, CA

Dear Hiring Manager,

I am writing to apply for the 2025 Summer Intern, XR Graphics Developer position at Samsung. I am currently pursuing a Master's degree in Computer Science at USC, where my academic and project work in computer graphics have fueled my interest in XR development. I am eager to bring my technical expertise, problem-solving skills, and enthusiasm for cutting-edge graphics technology to your team.

My coursework has provided a strong foundation in 3D graphics, and I have completed multiple OpenGL projects that sharpened my proficiency in C++. If you would like to learn more about my work, please feel free to visit my personal webpage at <https://heyumeng.com>. During my undergraduate studies at the University of Toronto, I double-majored in Mathematics and Computer Science, which gave me a solid theoretical background. I also participated in a one-year co-op program, gaining valuable internship experience that honed my debugging skills and ability to troubleshoot complex issues.

I would welcome the opportunity to discuss how my background, technical skills, and passion for XR graphics can contribute to Samsung's projects. Thank you for considering my application. I look forward to the possibility of joining your team and helping advance the next generation of immersive technologies.

Sincerely,

Yumeng He
